PROFILE

Data Science Engineering student (UVM) with recent hands-on experience building a full-stack web platform (React + Vite) to manage educational programs for INJUVE Nuevo León, including role and permission modeling, cross-site reporting, and data analysis for student retention. Complements this technical foundation with 3+ years managing quality metrics, audits, and data traceability in regulated environments (healthcare, clinical research), bringing analytical rigor and attention to detail uncommon in a junior profile.

TECHNICAL SKILLS

- **Web development:** React, Vite, JavaScript — building full-stack applications with user roles and permissions
- **Data:** SQL (querying and database modeling, ER diagrams, normalization), data cleaning and exploration
- **Visualization:** Tableau, McCandless method for data storytelling
- **Tools:** Advanced Excel, Big Data and data mining fundamentals
- **Management:** Project management (PMBOK framework), data governance and regulatory compliance

FEATURED PROJECT — LENGUA JOVEN PLATFORM (INJUVE N.L.)

Full-Stack Developer / Data Analysis | Social Service — INJUVE Nuevo León *Jul 2026 – Present*

- Designed and built a web platform (React + Vite) to manage language programs across multiple school sites, with six user roles (superadmin, director, coordinator, teacher, student, sales admin) and role-based permissions.
- Identified and fixed a critical business bug where directors and coordinators could see data from other sites, via a centralized access-control function — improving the integrity of the data shown to each user.
- Built cross-site reporting, a filterable external-school catalog from a partner Excel dataset, and a partnership-expiration alert module.
- Analyzed program operational data to identify opportunities to improve student retention.
- Documented the program's operations manual into 11 flowcharts and a 14-entity entity-relationship diagram.

ACADEMIC PROJECTS

- **Data Mining:** analyzed a real labor-market dataset to identify patterns and generate actionable insights
- **Google Data Analytics (Coursera):** Tableau visualization applying the McCandless method for data storytelling
- **Database Modeling:** designed ER diagrams and SQL queries for business scenarios
- **Big Data:** fundamentals of large-scale data processing and analysis

PRIOR EXPERIENCE — QUALITY & REGULATORY COMPLIANCE

3+ years managing quality metrics, audits, and data traceability in healthcare and clinical research.

Quality Management Manager | Grupo Médico Axis *Mar 2026 – Jul 2026*

- Managed the Quality Management System, including generating and analyzing KPIs for decision-making, and ensured regulatory compliance with COFEPRIS.

QA & Compliance Lead | QBridge AI *Oct 2025 – Mar 2026*

- Led quality and compliance initiatives across technology and data projects, implementing traceability controls and data governance.

PM – SAP Implementation / QA Specialist | Avant Santé Research Center *Oct 2022 – Oct 2025*

- Coordinated cross-functional teams on an SAP implementation and oversaw clinical trial processes, ensuring compliance with ANVISA, COFEPRIS, FDA, and ICH.

Other Quality & R&D roles: PROBOCA · La Tinaja · Walmart (2019–2022)

EDUCATION

- **Data Science Engineering** — UVM (2026)
- **B.S. in Food Science** — UANL (2020)
